"Fear and trembling hope ...and time the shadow"

The new sun dial outside the offices of "The Times", London.

History *as it happened.* The events, fears, triumphs and speculations of over 180 years are recorded in the pages of "The Times"—an invaluable reference for libraries, colleges and universities the world over.

"The Times" recorded on space saving 'Recordak' microfilm means quick and simple reference. The 'Recordak' microfilm editions of "The Times" and its various supplements is available as a complete record, or in individual years.

We shall be happy to furnish you with further data on this unique historical record.

"O goodly usage of those antique times"

(Edmund Spenser)

THE TIMES PRESS CUTTINGS BOOKS

The Times Press Cuttings Books form an invaluable source of reference on subjects ranging from Africa to Yugoslavia and from Archaeology to Weather.

These unique volumes are arranged in two groups under geographical and subject headings. They are compiled daily for the use of *The Times* Intelligence Department. Each volume contains, in chronological order, all the references published in the newspaper for the period indicated.

Now, xerographic facsimiles of these invaluable sources of reference data can be made available to Governments, Trade Associations, Libraries, Universities and Scholars.

A subject list of the Cuttings Books available and the periods covered by each will be sent on application.

University Microfilms Ltd.

St. John's Road, Tylers Green, Penn,
High Wycombe, Buckinghamshire, England.

The Index is compiled from the final edition of THE TIMES. Subscribers to the Index are advised to order this edition for filing purposes.

Provision is made for the possible issue of seven editions of THE TIMES, and these are identified by reference to the stars in the top right-hand corner of the back page. Thus ****** denotes the first edition, each subsequent edition having a star removed.

Matter appearing in the early editions, but not in the final issue, is indexed from the last edition in which it appeared. Thus, if 4* is shown after the page reference this indicates that the matter appeared in the edition with four stars on the back, and possibly in the editions preceding it. The position of news may change when fresh material is added: if, therefore, the final edition is not filed some search may be necessary for these changes of position.

In each entry the first numeral indicates the day of the month and the second the page. The letter after the page number indicates the column of the page: for reference purposes the columns of each page are assumed to be lettered from left to right—a, b, c, d, e, f, g, h. Thus January 8, 8f denotes the issue of January 8, page 8 and column 6.

Foreign relations between two countries are indexed to the country first in the alphabet (i.e. FRANCE: United States, relations with) the only exception to this rule being Britain's foreign relations, which are indexed to the country concerned (i.e. UNITED States: Great Britain, relations with).

Trade between two countries is indexed to that title under the country first in the alphabet (i.e. FRANCE: Trade: United States, with), the exception again being Britain (i.e. UNITED States: Trade: Great Britain, with).

Statements made in Parliament are indexed to the name of the speaker and to "Parliament: discussed" under the subject (i.e. Labour: Wages: Parliament discussed).
